SUMMARY

Fullstack developer with a track record of shipping end-to-end systems, from requirements to production, for global brand campaigns including Heineken, Ambev and FEMSA. Works independently across both ends of the stack, from REST APIs and data modeling through to scalable interfaces, and takes LLMs into production as an efficiency differentiator.

EXPERIENCE

Fullstack Developer · Abdou

Oct 2025 – Present

Jacareí, SP, Brazil (Remote)

- Architected end-to-end fullstack solutions for high-traffic Heineken, Ambev and FEMSA campaigns, with REST APIs on Django + PostgreSQL and React/Next.js + TypeScript frontends, deployed on AWS S3 + CloudFront for low global latency.
- Reduced validation failures in critical multi-step workflows by modeling schemas with React Hook Form + Zod, improving data integrity and completion rates in high-value business processes.
- Shipped production AI pipelines with LangChain, the Claude API, RAG and MCP servers (GitHub, Context7, Asana); autonomous agents took over content generation, data analysis and context retrieval.
- Unified the UI of concurrent projects into a single design system with TailwindCSS + Shadcn/UI, sustaining visual consistency and delivery speed.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES2022+), TailwindCSS, Shadcn/UI, React Hook Form, Zod, Framer Motion

Backend: Python, Django, Django REST Framework, PostgreSQL, MySQL, REST APIs, JWT/OAuth authentication

Infrastructure & DevOps: AWS S3, AWS CloudFront, Vercel, Git, GitHub, CI/CD

AI & Agents: Claude API, OpenAI API, LangChain, RAG, MCP servers, prompt engineering, autonomous agents

Practices: component architecture, Zustand / Context API, state management, code review, TDD

EDUCATION

Associate Degree in Systems Analysis and Development, IFSP, Jacareí Campus

2022 – 2025

LANGUAGES

Portuguese (native) · English (advanced: technical reading, writing and conversation)
